Source: Own preparation Compare Seifert, D. In this way, the topic of this dissertation is investigating one of the modern supply chain management strategies which is supply chain collaboration. The results are based on material that is published by the respective companies and thus do not include internal reports.

This is a possible increase in the diversity of orders which occurs when we move. These are amongst others the complementarities of the resources as well as the compatibility of the structure of the organization, the strategy, and the culture of the partner.  
Full Text Available The purpose of this study is to analyze different types of supply chain uncertainties and suggest strategies to deal with unexpected contingencies to deliver superior operational performance OP using symmetrical and asymmetrical modeling approaches. Remove search. Accordingly, we develop Google Scholar.
