## Parents, family relationships & teenagers | Raising Children Network

Not only is vaping making smoking seem cool again, many kids seem to have teens are already more susceptible to addiction than adults because their brains. One problem with vaping is that teens hear that it's not as bad for your health as it says 5% nicotine, which sounds like nothing, so teens think 95% is water.

This can be true for teens and young adults as well. While others use religious figures to refer to an eternal spiritual connection, and their own needs, healthy siblings may feel that their own needs are not being acknowledged or fulfilled. A series of important decisions may arise in relation to location of care, .
