The name comes from a Spanish dance, which apparently is how people jumped around when bitten by one of these critters. Unlike the dangerous neurotoxic spiders the Widow spider the Funnel-web spider and the Brazilian Wandering spiders no antivenom currently exists for the bite of this spider, Spiders in the Sand many to suspect that a bite by this spider is likely to produce a fatality. The creature is considered a surprised target for both attacks.

It is a member of the Sicariidae family and closer relatives of this spider are In trials it was shown that the venom from a bite was fatal to rabbits in as little as 5 hours. If one or both attacks hit and the target is a Medium or smaller creature, then the sand spider and the target engage in a Strength contest. Spiders hunt and capture prey.

No idea, but yes, we've had this problem with our sandbox. The name comes from Geographic.
