Nature – New research in a large sample of participants finds that too little low-density lipoprotein cholesterol correlates with a higher risk of bleeding stroke. Furthermore, researchers have documented roles for insulin, a pleiotropic peptide traditionally discussed in terms of metabolic disorders like diabetes and obesity, in neuron growth, neuroplasticity, and neuromodulation.

Hunger, for example, can trigger intense bouts of feeding in rodents, monkey One such adipokine, leptin, has been found to be elevated in patients with depression, and postmortem studies of depressed patients who committed suicide revealed a downregulation of leptin receptors in the frontal cortex. To take a more extreme case, obesity has been identified as a risk factor for dementia. New Password. EzguF.Curr Opin Pediatr.
