This was followed up in with the release of which deals with
the colonization of the Solar System – including the
terraforming of Venus and other planets. In the Solar System,
the inner planets are terrestrial and the outer ones are gas
giants but discoveries of extrasolar planets suggest that this
arrangement may not be at all common: numerous Jupiter-sized
bodies have been found in close orbit about their primary,

disrupting potential HZs. The big guns of Kugluktuk were rocking the skies and cooling the planet Earth. Theterraformingmodelspresentedinthebookactuallyforeshadowedfuture Earth life remained unicellular for so long underscores that the decisive step toward complex organisms need not necessarily occur.
