As you get to slower and slower shutter speeds, you start to see more motion blur in your images, depending on whether or not subjects are moving. Use it! Providing you don't want to make too many radical changes to an image after you've taken it, you may find you can't tell the difference between a JPEG file and a raw one.

Iwillbeginning.Thosethreestettingsare"aperture", "shutterspeed", and
are plenty of great entry level models like the Canon T3i which will make you feel more comfortable in the transition and has more room for error.
